Invoice Factoring provides steady and predictable cash flow which lets your business grow

Immediate Cash For:

- ✓ **Payroll**
- ✓ **Marketing**
- ✓ **Inventory**
- ✓ **Expansion**
- ✓ **Anything!**

Invoice factoring is so popular today because it provides businesses with a much needed influx of cash. For the most part banks are only lending to A+ rated companies. This coupled with the fact that companies are holding on to their cash as long as possible and paying invoices as late as possible leaves many firms in a cash flow bind.

Invoice Factoring is a simple process:

-  **1.** You deliver your goods or services
- 2.** Send us a copy of the invoice
- 3.** Your account is funded the next day

Our invoice factoring program is not a loan so it doesn't require a lot of paperwork and there are no restrictions on the cash. You can use it for whatever purpose you desire. Also, you can choose the customers you wish to factor. If you have a customer that pays you immediately then you do not need us for that customer.
